Creative Soccer Skills Philosophy, Aims & Ethos

Creative Soccer Skills provides boys and girls with coaching based on the philosophy of achieving technical competence and ball mastery before moving onto tactics or game play.

We believe, regardless of natural ability and using the powers of football as the medium our programme will enable young people to develop co-ordination, balance, rhythm and general well being alongside developing their technical ability with a football.

We are different from conventional football training, but not only through the use of smaller balls during our sessions, but also with our approach to coaching. All sessions are held in a very positive atmosphere encouraging children to develop as confident and creative young people. Moreover we are committed to helping all players to develop their skills and confidence in a safe, inclusive and focused learning environment.

We take a holistic approach to our work with children. We aim for our programme to play a role in helping children develop as good young people.

Benefits of Creative Soccer Skills

- ▣ Positive learning environment
- ▣ Fun, fast, skill based sessions where creativity and innovation are embraced.
- ▣ The programme works for children of all abilities, as all children are able to work at their own level and speed
- ▣ Our programme, as well as being fun, exciting and progressive promotes the development of balance, co-ordination and strong movement patterns which are fundamental to all movements and transfer easily to other sports and activities.
